

Luis Ángel Pérez Aguilera

Front-end developer · Information Technology and Digital Innovation Engineering student

Phone: 961 453 3787 · Email: przs2773@gmail.com

GitHub: github.com/lspzs2773 · LinkedIn: linkedin.com/in/luis-pérez-7322a7393

PROFILE

Results-oriented front-end developer with experience in technologies such as Next.js, Node.js and TypeScript. Self-taught, eager to learn new technologies and to apply best practices in software development.

PROFESSIONAL EXPERIENCE

Project lead, E-commerce, Xenio SA de CV

2026

Development of an e-commerce application for Xenio, with multi-tenant support and integration with external wholesaler APIs.

PROJECT EXPERIENCE

ReadFlow

JANUARY 2026 - PRESENT

Testing a hypothesis based on Ebbinghaus's forgetting curve, using immediate and spaced summaries and quizzes created with artificial intelligence. Built with technologies such as Next.js, Node.js + Express and PostgreSQL.

- Designed the application's frontend using Next.js and TypeScript
- Implemented direct communication with a REST API built with Node.js + Express

BariaPlus

SEPTEMBER 2026 - DECEMBER 2026

Build an application designed for managing patient records and appointments for bariatric physicians. Built with Angular, Ktor and PostgreSQL.

- Designed the application's frontend using Angular with TypeScript
- Implemented direct communication with a REST API built with Ktor (Kotlin)
- Created reusable components following Angular design patterns
- Implemented form validation and state management with RxJS

StudyOmo

MAY 2026 - AUGUST 2026

Build an application for teachers and students that supports creating time-limited tasks and any number of pomodoro sessions assigned by the teacher to the students of a previously created class. Built with HTML, CSS, JavaScript and Java + Javalin.

- Designed the application's REST API using Java + Javalin
- Implemented authentication and role management (teacher/student)
- Developed the frontend with HTML, CSS and JavaScript.

EDUCATION

Universidad Politécnica de Chiapas, Information Technology and Digital Innovation Engineering

SEPTEMBER 2024 - PRESENT, Suchiapa, Chiapas

Pursuing an engineering degree in Information Technology and Digital Innovation, focused on software and web application development. Comprehensive training in programming, databases, software architecture and agile development methodologies.

Centro de Bachillerato Tecnológico Industrial y de Servicios No.244, Office Automation

SEPTEMBER 2021 - AUGUST 2024, Tuxtla Gutiérrez, Chiapas

Technical high school with a specialization in Office Automation. Technical training in productivity tools, programming fundamentals and information technology.

KNOWLEDGE AND TECHNOLOGIES

Programming languages: TypeScript, JavaScript, Java, Kotlin, Node.js, SQL

Frontend: Next.js, Angular, React, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, Javalin, Ktor, RESTful APIs

Databases: PostgreSQL, MySQL, Normalization, SQL queries, Database design

Development tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman

DevOps and deployment: Docker, GitHub Actions, Continuous deployment

Methodologies: Agile development, Version control with GitHub, Teamwork

Other: API consumption, Frontend-backend integration, State management, Authentication and authorization
